

AMNA ATTARIA

(FULLSTACK DEVELOPER)

ABOUT ME

There is a typo in your last sentence: "sotwere" should be corrected to "succeed." Here's the revised version: I am a passionate and dedicated Full-Stack Developer currently pursuing Software Engineering at Aptech Learning. I have expertise in **HTML, CSS, JavaScript (ES6), Bootstrap, Tailwind, React, PHP, MySQL, SQL Server**, and **Angular**, along with strong skills in office automation. I have achieved the '**Student of the Month**' award twice at my academy and actively participated in various competitions and hackathons, enhancing my problem-solving and teamwork abilities. I am eager to apply my knowledge to real-world projects, collaborate with professionals, and continuously learn new technologies to succeed in the field of software development.
